

# Contents

<b>Chapter A Introduction.....</b>	<b>1</b>
<b>Chapter B Handbook structure and how to use it.....</b>	<b>5</b>
<b>Chapter C Scenarios .....</b>	<b>11</b>
1 Introduction.....	11
2 Considered scenarios .....	11
2.1 Radiological Exposure Device.....	12
2.2 Radiological Dispersal Device.....	12
2.3 Attack on transport of radioactive material.....	13
2.4 Contamination of food and water supplies .....	13
<b>Chapter D Public information and communication strategy .....</b>	<b>14</b>
1 Introduction.....	14
2 Public communication as an emergency response tool .....	14
3 Effective public information – some key elements .....	16
4 Plan ahead .....	17
5 Coordination and consistency .....	18
6 Instructions – public communication in the event of malevolent use of radiation.....	18
<b>Chapter E Immediate actions.....</b>	<b>22</b>
1 Control of exposure.....	22
1.1 First responders .....	24
1.2 Authorised personnel .....	30
1.3 Public .....	30
1.4 Dealing with deceased persons .....	34
2 Monitoring to confirm a radiation emergency .....	36
2.1 Contamination and irradiation incidents .....	40
2.2 Contaminated food/water incidents.....	50
3 Establishing zones and zone boundaries.....	54
3.1 Initiate the Red Zone .....	54
3.2 Initiate the Yellow Zone .....	60
3.3 Evolution of the Red Zone .....	62
3.4 Evolution of the Yellow Zone .....	64
3.5 Outside the Yellow Zone .....	68

<b>Chapter F Triage and monitoring for the purpose of screening .....</b>	<b>70</b>
1 Objectives of triage .....	70
2 Initial triage.....	74
2.1 Trauma triage .....	74
2.2 Radiological triage .....	80
2.2.1 Triage based on information on location .....	80
2.2.2 Triage based on clinical signs and symptoms .....	98
3 Initial monitoring.....	110
3.1 Preparatory actions for monitoring teams .....	112
3.2 Environmental monitoring .....	116
3.3 Monitoring people for external contamination.....	124
3.4 Monitoring people for internal contamination .....	134
3.4.1 <i>In vivo</i> monitoring .....	134
3.4.2 <i>In vitro</i> monitoring .....	142
4 Advice on dealing with psychological issues.....	146
<b>Chapter G Decontamination of people in the field .....</b>	<b>150</b>
1 Preparations for decontamination of people .....	152
2 Decontamination procedures.....	156
2.1 Instructions common to all decontamination procedures.....	156
2.2 Decontamination using specialist mass decontamination facilities .....	158
2.3 Decontamination procedure for people in trauma triage group P2 .....	158
2.4 Decontamination of small numbers of people .....	160
2.5 Decontamination of larger numbers of people .....	162
3 Self-decontamination at home.....	164
4 Contamination control .....	166
5 Waste considerations .....	166
<b>Chapter H Monitoring for dose assessment purposes.....</b>	<b>168</b>
1 Objectives of individual monitoring.....	168
2 Specifying a monitoring strategy .....	170
2.1 Identification of radionuclide(s) .....	172
2.2 Characterisation of source .....	172
2.3 Selection of individuals for monitoring .....	174
2.4 Locations for individual monitoring.....	176
2.5 Individual monitoring methods.....	176
3 Monitoring techniques.....	182
4 Later triage and monitoring.....	188
4.1 Action Levels.....	188
4.2 Triage after initial external contamination measurements .....	190
4.3 Triage after initial internal contamination measurements.....	194

4.4	Triage after cytogenetic measurements .....	200
5	Dose assessment methods .....	202
5.1	Internal dose assessment .....	204
5.2	Assessment of dose to the skin resulting from external contamination .....	208
5.3	Issues for consideration when performing more accurate assessment of internal dose .....	210
5.4	Estimation of dose from external irradiation .....	212
6	Recording and reporting results .....	216
<b>Chapter I Handling of contaminated casualties and transport to hospital .....</b>		<b>222</b>
<b>Chapter J Medical management at the hospital .....</b>		<b>230</b>
1	Receiving notification of the incident .....	232
2	Preparing the hospital for patient reception .....	234
3	Arrival of patients at the hospital .....	240
4	Performing a second triage at the hospital .....	246
5	Management of uncontaminated but possibly irradiated casualties .....	250
5.1	Therapeutic Principles for ARS patients .....	268
6	Combined injuries .....	276
7	Local radiation injuries .....	282
8	Radionuclide contamination .....	296
9	Dealing with deceased persons at the hospital .....	314
10	Cytogenetic dosimetry .....	316
<b>Chapter K Public health response .....</b>		<b>320</b>
1	Introduction .....	320
2	The role of the health authorities during the emergency .....	320
3	Risk communication and communication with health care workers .....	321
4	Establishing peripheral health care centres .....	323
5	Referral hospitals .....	325
6	Dealing with worried well .....	326
7	Outbreak of unusual disease attributable to radiation exposure .....	327
8	Prevention and treatment of psychological consequences .....	328
9	Taking decisions about long-term follow up of people involved in a radiation emergency .....	331
9.1	Long-term follow up of patients who developed local radiation injuries .....	332
9.2	Long-term follow up of casualties who developed acute radiation syndrome (ARS) .....	334
9.3	Long-term follow up of populations exposed to low doses .....	335

<b>Chapter L International liaison .....</b>		<b>338</b>
1	Introduction .....	338
2	International notification arrangements .....	338
2.1	The Early Notification Convention .....	339
2.2	The European Commission Notification system .....	339
2.3	World Health Organization .....	340
3	Coordination of international assistance .....	340
<b>References .....</b>		<b>342</b>
<b>Bibliography .....</b>		<b>356</b>
<b>Glossary .....</b>		<b>362</b>
<b>List of abbreviations .....</b>		<b>375</b>

<b>Annexes .....</b>		<b>380</b>
<b>Annex 1:</b>	Required facilities .....	380
<b>Annex 2:</b>	Equipment required for radiological triage and monitoring purposes .....	386
<b>Annex 3:</b>	Forms, questionnaires and information leaflets .....	392
<b>Annex 4:</b>	Allocation of roles .....	428
<b>Annex 5:</b>	Interpretation of clinical signs and symptoms .....	434
<b>Annex 6:</b>	Specifying a monitoring strategy for internal contamination .....	438
<b>Annex 7:</b>	Later triage and monitoring .....	441
<b>Annex 8:</b>	Monitoring techniques .....	444
<b>Annex 9:</b>	Biodosimetry .....	466
<b>Annex 10:</b>	Action Levels .....	470
<b>Annex 11:</b>	Sampling of excreta and blood .....	491
<b>Annex 12:</b>	Management of internal contamination .....	495
<b>Annex 13:</b>	Look-up tables for the assessment of internal doses .....	505
<b>Annex 14:</b>	Methodology applied by WHO for developing guidance on health interventions for Chapters J and K of this Handbook .....	553
